

## Standardized Testing

Heritage families,

Every year we have offered standardized testing for students as a service to the Heritage families and the homeschool community. The purpose is to help you, the parent, to evaluate your student's learning in each of the subject areas to better focus your educational plans for the next year. With our new location this year, we do not have a facility available to hold testing like we have in the past, so things will look a little different this year. We plan to return to our regular schedule of in-person testing the following year (May 2025).

This year we are recommending online testing through BJU Press. They offer IOWA tests for grades K-12 scheduled at home at your own convenience for \$45 per student. Please click the link below for ordering information and system requirements. It is important to schedule this early because time slots do fill up.
