Heritage Lab Days

We are excited to announce that Heritage will have in-person lab days for our science classes this fall! We will still have lecture/class via Zoom on Mondays, but we will add biweekly lab days on Wednesday mornings. Labs and hands on activities are really what make science understandable and fascinating, so we believe lab days are *essential* to learning.

When and Where?

Wednesdays: 9/2, 9/16, 9/30, 10/14, 10/28, 11/11, 12/9

Time: 8 am-12 pm

New Covenant Bible Church, rooms 1-6 in first hall only

Hour	Room 1	Room 2	Room 3	Room 4	Room 5	Room 6
8	Physical	Chemistry	Physics	Advanced	Anatomy Jr.	Bio section 1
a.m.	Science sect. 1	section 1		Bio		
9	Physical				Astronomy/	
a.m.	Science sect.				Botany	
	2					
10	Physical	Chemistry	Bio section 3	MS Bio		Bio section 2
a.m.	Science sect.	section 2				
	3					
11						
a.m.						

Which classes?

Biology (Wirth), Chemistry (Laker), Physics (Dille), Advanced Biology (Jaros), Physical Science (Eggers), Middle Sch. Biology (Jaros), Astronomy and Botany (McGrath), and Anatomy (McGrath) Teachers with multiple sections will schedule who is in which section directly with the parents. There will be a waiting area for students who are done early. We will need a couple of parent volunteers to supervise that area.

What precautions for safety?

If students or their immediate family members are sick or display any symptoms of Covid, they should stay home!

We will make use of 2 entrances—the usual one off the parking lot for rooms 1, 2, 4 and the back door off the driveway (by the mobile units) for rooms 3, 5, 6. Parents and siblings will not enter the building—drop off and pick up only. As students arrive, they will be required to wear masks, have their temperature taken, and proceed directly to their classroom to wash their hands. Hand sanitizer will also be available in the classrooms. Because labs often involve working together with other students in groups, students will wear masks during class.

Are lab days required?

Lab days are highly recommended and vital to learning, but if you are not able to make it, talk with your teacher about options such as Zoom, videos, or home labs.
